Welcome Message

Hur, Nam-sik
Mayor, Busan Metropolitan City

It is indeed a great pleasure for me to welcome you and express my heart-felt appreciation to ICAP 2008 on behalf of the Busan citizens. As the mayor of the host city Busan of the 5th ICAP 2008, I feel deeply honored.

My special words of thanks and respect should go to the mayor of Osaka, Japan, without whose initiatives the ICAP could not have existed. I am also very grateful for the support and active participation by other mayors and delegates which enabled the ICAP to develop up to this year's 5th Meeting.

At the ICAP 2008 Busan, the global keyword of this century, "sustainability" will be the core theme. We will share views and have sincere discussions among the aquapolises of the world on "Sustainable Aquapolis".

As you may know, environmental issues are now "global priority tasks". The UNEP has urged the global community to move the issue of environment from the periphery to the center in policy-making.

International Conference of Aquapolises has expanded the scope of exchanges and cooperation to environment, culture, greenery, disaster prevention, and others thanks to active participation of member cities. As we live in the 21st Century, "the Era of Water", I am confident that ICAP 2008 Busan will be an epoch making occasion to further enhance the significance of ICAP 2008.

Busan has a master plan to create an international waterside space at the center, while developing an eco-friendly aquapolis in the western part. The Busan New Port will also be constructed, taking geographical advantage of the gateway to Northeast Asia. Let me make a promise that Busan will continue to make efforts for a continued development of ICAP and co-prosperity of member cities.

I do hope ICAP 2008 will further strengthen friendship and cooperation among cities, making the meeting a memorable achievement in the history of sustainable aquapolis development.

Once again, I welcome you all to the beautiful port city of Busan which is full of passion and romantic imagination. I wish every metropolitan government of yours success and good luck.

Hur, Nam-sik
Mayor, Busan Metropolitan City

Congratulatory Address

Hiramatsu Kunio
Mayor, City of Osaka

I am very pleased that the 5th International Conference of Aquapolises is being held on such a large scale with many delegates in attendance.

The city of Osaka first proposed the International Conference of Aquapolises, and held the first Conference in the city in 1990 under the main theme, "Creating Aquapolises of the 21st Century." Then, the second Conference was held in Shanghai, China; the third one in Piraeus, Greece; and the fourth one again in Osaka. Each Conference was a great success.

Busan Metropolitan City, which boasts a stunning natural environment such as beautiful seas and lush green mountains, has developed as a center of distribution business in northeast Asia. I am sincerely delighted that the 5th International Conference of Aquapolises is being held in such a beautiful and vibrant city.

It is of great significance that mayors, governors, experts and other delegates from aquapolises in countries and regions around the world are here to discuss community development featuring water and greenery under the main theme, "For a Sustainable Aquapolis," and to deepen exchanges. I would like to honor Mr. HUR Nam-sik, mayor of Busan Metropolitan City, and other persons dedicated to organizing the Conference.

Since I must go back to Osaka today to perform unavoidable official duties, I am afraid I will not be able to participate in further events after this opening ceremony.

I hope that you will conduct in-depth discussions on aquapolises for a new age, and that this conference will serve as an opportunity to communicate the attractiveness of aquapolises to the world. I am convinced that this conference will contribute to new community development featuring water and the creation of new urban civilizations around the world.

Like many other participating cities, the city of Osaka has flourished as an aquapolis since ancient times. Osaka is now making efforts to create a lively ambience in towns through its use of the city's greatest assets, such as a :water corridor,: a ring of waterways encircling the city center, and historic Western-style architecture, while promoting its attractiveness both at home and abroad. In this connection, we ask for your support and cooperation.

Finally, I hope that the 5th International Conference of Aquapolises will be a great success and a fruitful event. With this opportunity, I wish you continued good health and success.

Hiramatsu Kunio
Mayor, City of Osaka

Congratulatory Address

Jo Kil-Woo
President
Busan Metropolitan Council

Let me first congratulate the 5th ICAP 2008, which is being held to discuss the means of achieving a green global village with cities enjoying sustainable growth, where lives abound, men and nature coexist.

On behalf of the Busan citizens, I welcome all the mayors, governors, leaders and experts from across the world. Busan, the convention city of Asia, is especially proud to host another event, the World Aquaculture 2008 Exhibition at the same time.

As already stated by Greek philosopher Thales "Water constitutes the principle of all things", water is the source of life, culture and economic advancement. And yet, development policy in industrialization period had damaged and polluted much part of water and natural sources and green areas. Global warming and desertification are emerging threat to human survival.

Busan is one of the leading industrial areas in the nation, and suffers problems in urban environment, mainly caused by lack of awareness and efforts to protect water sources and greenery in the area. Fortunately, however, we are now focusing on urban revitalization projects, to restore the old beauty of Busan, the "City of Three Ports (三浦之郷)" and its well harmonized environment -- eco-friendly urban area, sea and river and mountains.

I do hope the ICAP 2008 conference will go down in history as a significant momentum in renewing the awareness and understanding of the importance and value of water and greenery. The meeting will also be a valuable arena in looking for means of improving the situation through global collaboration.

Villages and people can be linked via waterways. So can our meeting of aquapolises open the channels of exchanges and cooperation among cities, which will definitely play a critical role for harmony, peace and prosperity on the green Earth. I wish the aquapolis community all the best.

Jo Kil-Woo
President, Busan Metropolitan Council

Conference Overview

THE 5TH INTERNATIONAL CONFERENCE OF AQUAPOLISES

TITLE	The 5 th International Conference of Aquapolises
PERIOD	May 21st (Wed) ~ 23rd (Fri), 2008
TOPIC	For a Sustainable Aquapolis
ORGANIZED BY	Busan Metropolitan City

OFFICIAL LANGUAGE	English Opening Ceremony Plenary Session (Simultaneous Interpretation) : English, Chinese, Japanese, Korean, French Experts' Session : English Investment & Tourism Promotion Seminar Closing Ceremony (Simultaneous Interpretation) : English, Chinese, Japanese, Korean, French
PARTICIPATING CITY	<ul style="list-style-type: none"> ● Austria - Vienna ● China - Beijing, Guangzhou, Guilin, Heilongjiang, Lianyungang, Shanghai, Ya An, Zunyi ● Congo - North Kivu, South Kivu, Uvira ● Germany - Hamburg ● India - Gujarat ● Japan - Fukuoka, Fukuoka Prefecture, Kitakyushu, Nagasaki Prefectural, Niigata, Osaka, Saga Prefectural Government, Shimonoseki, Tokyo, Yamaguchi Prefecture ● Korea - Busan Metropolitan City, Goseong County, Gyeongsangnamdo, Jeju Special Self Governing Province, K Water, Kolon, POSCO E&C, Seoul Metropolitan Government, Ulsan Metropolitan City, Veoliawater Korea ● Russia - St. Petersburg, Vladivostok ● Rwanda - Kigali ● Serbia - Belgrade ● Chinese Taipei - Kaohsiung ● Tanzania - Kagera, Musoma, Mwanza ● Turkey - Ankara, Istanbul ● UAE - Dubai ● U.S. A. - Illinois, Los Angeles, San Bernardino ● Vietnam - Ho Chi Minh City

About ICAP 2008 Busan

Human civilization is based on water. Nothing and no-one can live without it. Ironically, water can also bring disaster as well as life. Floods and droughts threaten us at times, and water pollution, acid rain, land subsidence, and other environmental disasters caused by industrialization and overpopulation have become serious problems. Therefore, it is fair to say that the history of human beings can, in part, be characterized by our battles and balance with Mother Nature.

The 5th International Conference of Aquapolises, which will be held in Busan in May 2008, will provide a good opportunity for mayors and governors from around the world to exchange ideas and opinions on water-related problems and to discuss ways to address them. The conference will be held under the main theme of "For a Sustainable Aquapolis" and a number of sub-themes.

Main theme : For a Sustainable Aquapolis (Mayors & Governors' Session)

Sub-themes : Four Experts' Sessions (Expert Group Meeting)

Session 1 : Development of a City through the Use of Water and Greenery
by Using and Creating Waterfront Spaces

Session 2: Water Transportation & Urban Development

Session 3: Eco-friendly Environment in and around Urban Streams

Session 4: Weather Disaster & Water Resource Management

In the 21st Century, as more and more of us enjoy the comforts of urban life, and as old problems are resolved with the development of various new technologies, we are constantly faced with new challenges. Both the main theme and the sub-themes show our strong will to make our lives more prosperous and our natural environment more beautiful. The 5th ICAP is also expected to build information exchange and deepen friendships among participating cities.

Social Program & Tour

WELCOME DINNER

19:00~20:30, May 21 (Wed), 2008

Venue : The Westin Chosun Busan

Attendance : ICAP 2008 Busan Delegates

Dress Code : Business Casual

The first evening of the ICAP 2008 Busan will feature a Welcome Dinner in the Grand Ballroom of the The Westin Chosun Busan. This evening will be the perfect opportunity for delegates to relax and get acquainted. The delegates will appreciate the enchanting music by the Busan Municipal Traditional Music Troupe

FAREWELL DINNER CRUISE

19:00~21:30, May 22 (Thu), 2008

Venue : Tiffany 21 (Cruise)

Attendance : ICAP 2008 Busan Delegates

Dress Code : Business Casual

Course : Dongbaek Island - Haeundae Beach -
Cheongsapo - Gwangsan Bridge -
Dongbaek Island

Intended to cement the relationships that have been formed during the congress, the Farewell Dinner Cruise is guaranteed to be a memorable event that will send everyone home satisfied and happy. Followed by a fine dinner and fantastic cruise party, an acclaimed performance based on Korean traditional dance and other various events will provide the delegates with an amazing experience with a different culture.

CITY TOUR

15:00~19:00, May 22(Thu), 2008

Place : UN Memorial Cemetery in Korea,
Beomeosa Temple

Attendance : ICAP 2008 Busan Delegates

UN MEMORIAL CEMETERY IN KOREA

The United Nations Memorial Cemetery and Peace Park honors UN soldiers from 16 countries that were killed in battle during the Korean War from 1950-1953. This serene park spreads across a grassy plain area of 135,000 square meters. Some of the sites and memorials include: Memorial Service Hall, Memorabilia Hall, 2 Turkish Monuments, Greek Monument, Australian Monument, British Commonwealth Monument and 2 ponds. The Memorial Service Hall and the Memorabilia Hall were constructed in 1964 and 1968 respectively. The citizens of Busan dedicated the Main Gate in 1966. There are many annual events held here, some of the key events include: April's Tributary Ceremony of the Veterans of the Korean War, May's American Memorial Day, June's Korean

Memorial Day, and October's UN Ceremony Day.

Social Program & Tour

BEOMEOSA TEMPLE

Beomeosa Temple is located at the edge of a famous mountain in Busan, Mt. Geumjeongsan. About 1,300 years ago it was constructed by monk Ui Sang in the 18th year (678) of King Munmu (reign 661~681) of the Silla Kingdom (the kingdom mainly occupied the Gyeongsang-do Province region in 678 A.D.). In the geography book 'Donggukyeojiseungram' the origin of Beomeosa Temple is written as follows: "There is a well on the top of Mt. Geumjeongsan and the water of that

well is gold. The golden fish in the well rode the colorful clouds and came down from the sky. This is why the mountain is named Geumsaem (gold well) and the temple is named 'fish from heaven'."

The original Beomeosa Temple building was lost during Imjinwaeran Invasion (Japanese Invasion of Korea in 1592) but was renovated in 1713, which remains as it is now. Daeungjeon contains some of the most delicate and luxurious architecture of the Joseon Dynasty (1392~1910). There is Iljumun, the three-story pagoda with four pillars, built in the 9th century, and seven royal palace wings, numerous pavilions, three gates, and eleven hermitages. Designated as a natural monument, the wisteria woods and valleys are most beautiful in May.

ECO-TOUR

10:00~15:00, May 23(Fri), 2008

Place: Busan New Port, Nakdong Estuary
Eco Center (lunch is included)

Attendance: ICAP 2008 Busan Delegates

BUSAN NEW PORT

Functioning as an efficiently positioned gateway hub port to Northeastern Asian countries, Busan New Port provides speedy service for local port call and transshipment. The port enjoys optimum access to Japan, the northeastern part of China and Russia, with an ideal position for transshipment. Busan port is also the first and last port for ships traveling North America - Asia

- Europe - Asia routes, in addition to being the trunk line between Korea and Japan.

NAKDONG ESTUARY ECO CENTER

Diverse materials on the ecological environment of the Nakdong Estuary are well documented and displayed at the Eco Center, and exciting nature observation and experience programs

are conducted. Birds and swamps are also important themes for research and exhibition at the Eco Center, which opened in June 2007 as a municipal facility of the Busan Metropolitan government.

General Information

KOREA

Korea has successfully leaped forward from a poor agrarian country to an OECD member in a few decades. Once called the 'Hermit Kingdom' or 'Land of Morning Calm', Korea is now bustling industrialized nation, leading the global electronics and communications industry.

Many international corporations and business have subsidiaries in Korea, and most Western franchises can be found throughout the country. In spite of the overwhelming trend of globalization, Koreans cherish and share highly homogeneous culture that can be traced back some 5 millennia.

BUSAN

Busan, the second largest city of the Republic of Korea with approximately 3.7 million residents, is located at the heart of the Pan Pacific area. Blessed with a harmonious natural environment of mountains, rivers and the sea, Busan hosts various festivals all year around. In addition, its deep harbor and gentle tides have allowed Busan to grow into the largest container handling port in the country and the fifth largest in the world, gaining a reputation as the marine capital of Northeast Asia.

Located on the southeastern tip of the Korean peninsula, Busan has long played an important role connecting the continent and the ocean. In particular, with the growing economic power of Korea since the 1970s and the global economic shift to the Asia Pacific, Busan has much potential as a leading regional and global gateway in the Asia Pacific area.

CLIMATE AND CLOTHING

Korea lies in the temperate zone and has four distinct seasons; spring, summer, fall and winter. May is the final month of spring. The average day-time temperature in Busan during the conference period will be in the range of 12°C (approx. 40.8°F) to 22°C (approx. 74.8°F), which will be perfectly mild and comfortable. Nonetheless, we recommend that you prepare a light coat or

a sweater for the evening.

CURRENCY

The currency exchange rate is subject to daily fluctuations and was trading at (1,067 per US\$1 as of May 14, 2008). Foreign currency and traveler's checks can be converted into Korean Won (₩) at most banks. Major credit cards are accepted at leading hotels, department stores and restaurants.

OFFICE HOURS

Government offices are open between the hours of 09:00 and 18:00. Most private business are open between 09:30 to 10:00 and close at 18:00. Banks are a major exception. Their business hours are from 09:30 to 16:30 on weekdays only. Foreign diplomatic missions in Busan generally maintain strict business hours including lunch. They are usually open from 09:00 to 17:00 on weekdays and are closed on Saturdays and Sundays. Major department stores are open from 10:30 to 19:30, including Sundays, but smaller shops tend to open earlier and close later every day of the week.

ELECTRICITY

In Korea, outlets for 220 volts are dominant. Always check the power supply before using your equipment.

TIPPING

Tipping is not a traditional Korean custom. A 10% service charge will be added to your bill at all tourist hotels.

SHOPPING

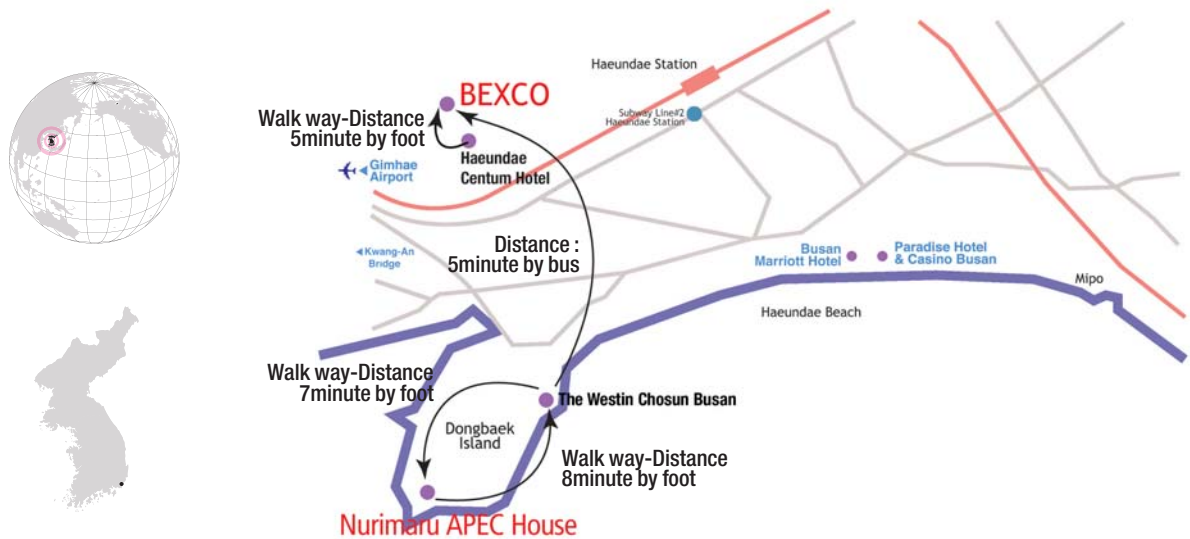

Busan offers a unique opportunity for shopping at reasonable prices. Electronics, textiles and clothes, ceramics and gin-seng products are the most purchased items by foreign visitors. Most department stores are open from 10:00 until 19:30, including Saturdays/Sundays and National Holidays. Some close for one day during the week.

INSURANCE

Delegates are advised to take out their own comprehensive travel insurance, as the organizers shall not be liable for personal accidents, illness, losses, or damage to private property
