Let's join the "neighborhood association" that plays a central role in the community activity council (Chikatsukyo) and create "connections" and "bonds".

Events and initiatives held in the community (festivals, sports days, coming-of-age ceremonies, community cafe, child-rearing salons, street security lights, blue crime prevention patrols, etc.) are carried out in cooperation with the local activity council and the neighborhood association. (with both human and financial support)

What is a neighborhood association?

The neighborhood association is a voluntary organization based on connections between people living in the area, and is the core organization of the various organizations that make up the community activity council. In times of emergency, you can rely on the familiar faces of your immediate neighbors.

Join the neighborhood association and participate in the creation of "connections" and "bonds" that cooperate, support, and help each other, such as disaster prevention drills in preparation for initial response in the event of a major disaster, watching over the elderly and going to and from school, cleaning activities, and interacting at summer festivals, and creating a safe, secure, and livable community!

To join the neighborhood association, please contact your local town chairman or group leader, or the ward community promotion association secretariat.

What does Community Activity Council mean?

Generally within the scope of the elementary school district, various organizations related to local community development, such as neighborhood association, NPOs, and companies, gather to engage in activities mainly related to crime prevention and disaster prevention, children and youth, welfare, health, the environment, culture and sports, and to solve various issues in the area.

For inquiries about the Community Activity Council, please contact the Joto Ward Office (Citizen Collaboration Division: ☎06-6930-9743 📠050-3535-8685) or the J Joto Ward Community Development Center.
