

Caution in heavy rain!!

It is dangerous to go outside in torrential rain or to flooded areas

If the flood risk is high, do not go walk outside. Wait indoors.

Stay safe

Doors may not open due to water pressure and put you in danger. Keep doors open in basements and low elevation areas.

Do NOT go check a river

People frequently go check rivers in torrential rain and become involved in accidents. Even if you have concerns due to continuous rainfall, do not go check a river.

Mitigate house flooding and damages to household goods

To be prepared if you need to stay at home, take measures to prevent your house from flooding. Once household goods become submerged in water, they instantly turn into garbage, and after a flood, the ward will be overflowing with flood debris. Take steps to mitigate damages to household goods as much as possible.
