

Are You Familiar with Evacuation Information?

We provide "evacuation information" in the event of a disaster by using five levels of alert. Make sure you know the meaning of each and be prepared to respond appropriately.

Alarm level and its meaning	
Announced by city, town or village	Alert Level 5 Emergency Safety Assurance A disaster has already occurred or is imminent. Immediately secure your safety because your life is in danger.
	Alert Level 4 All to Evacuate All people must evacuate themselves from dangerous areas. Evacuate somewhere safe nearby or move to a safer place in your home if you think moving to a public evacuation site is unsafe.
	Alert Level 3 Elderly to Evacuate Evacuate older people, disabled people, babies, etc. from dangerous areas. Others, if necessary, must independently evacuate themselves when they feel they are in danger. ※Even before Level 3 is issued, if you feel unsafe, evacuate voluntarily.
Announced by Meteorological Agency	Alert Level 2 Review Evacuation Acts Prepare for evacuation. Review actions to take by Hazard map, etc.
	Alert Level 1 Raise Awareness Raise awareness of disaster

If you are voluntarily evacuating, please secure a safe place in advance, such as a relative's or acquaintance's house.
 For those who have difficulty in securing a voluntary shelter, the City of Osaka may open a "Voluntary Evacuation Center".

Evacuation Information Issued by the Osaka City

In Osaka city, evacuation information will be announced if necessary using disaster prevention speakers, or by early warning email to mobile phones or smartphones.

Alert Level 3	Alert Level 4	Alert Level 5
Elderly to Evacuate Situations at Announcement ◆ In situation where the risk of human damage has been raised Actions to Take ◆ Those who need extra time for evacuation (the elderly, the disabled, babies, etc.) and their caregivers are to evacuate. Others are to prepare for evacuation.	All to Evacuate ◆ In situation where the risk of human damage has been obviously raised ◆ In situation where the risk of human damage is extremely high such as precursors occurrence ◆ All people must evacuate themselves from dangerous areas. ※Move to a safer place in your home if you think moving to an evacuation site is unsafe. ※A public evacuation site is not the only option. It is recommended to discuss regularly on evacuation to the home of your family in neighborhood, relatives or friends.	Emergency Safety Assurance ◆ In situation where a disaster has already occurred or is imminent. ◆ Take best action to
