# Flood Hazard Map for Asahi Ward

In Asahi Ward, inundation events due to flooding of the Yodo River, flooding in the Neyagawa River basin (Neyagawa River, Second Neyagawa River, Hirano River, diversion agueducts of Hirano River, and Furukawa River), a storm surge, and inland flooding and tsunami inundation events due to a massive Nankai Trough earthquake are assumed to occur.

☐ Is the area where you live prone to inundation?

Flooding of Yodogawa River

3 m to less than 10 %

(3F floor to 4F under

3 m to less than 5 m (2F floor to under eave

0.5 m to less than 3 m (1F floor to under eave

flooded)

Inland flooding

Flood depth

3.0m to less than 5.0m

1.0m to less than 3.0m

0.5m to less than 1.0m

0.3m to less than 0.5m

0.1m to less than 0.3m

Flood depth

☐ Where is the nearest safe evacuation shelter? ☐ Are there any roads or underpasses that could be covered with water on the way to the evacuation shelter?

Yodogawa River

Yodogawa River

Using this map, check in advance where safe evacuation shelters (disaster shelters, etc.) are located and which evacuation route to take to ensure safe evacuation in the event of an emergency. In the event of a large-scale inundation, disaster shelters are expected to be crowded. If evacuation shelters are located far from your house, you should expect that it will take time for the elderly to

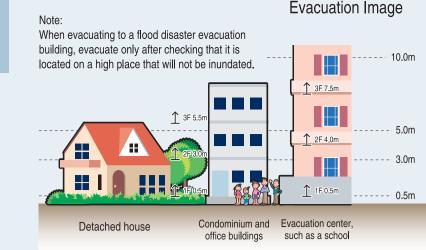

It is also important to secure more than one temporary shelter other than predesignated evacuation centers, such as securing condominium or other high buildings in the neighborhood by negotiating

Moreover, since it is dangerous to move out of your house during stormy weather, remaining in your house can be an alternative to evacuation as long as you have made appropriate disaster

1,000m

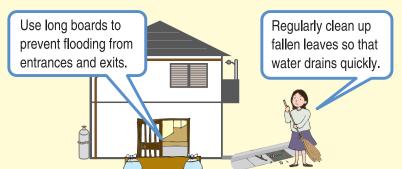

**30**min

\*A 24-hour rainfall total of 360 mm (Likelihood of probable maximum precipitation: about 1/1,000 years) is assumed.

#### Safety measures for your house

Reduce the likelihood of your house being inundated and your home contents damaged.

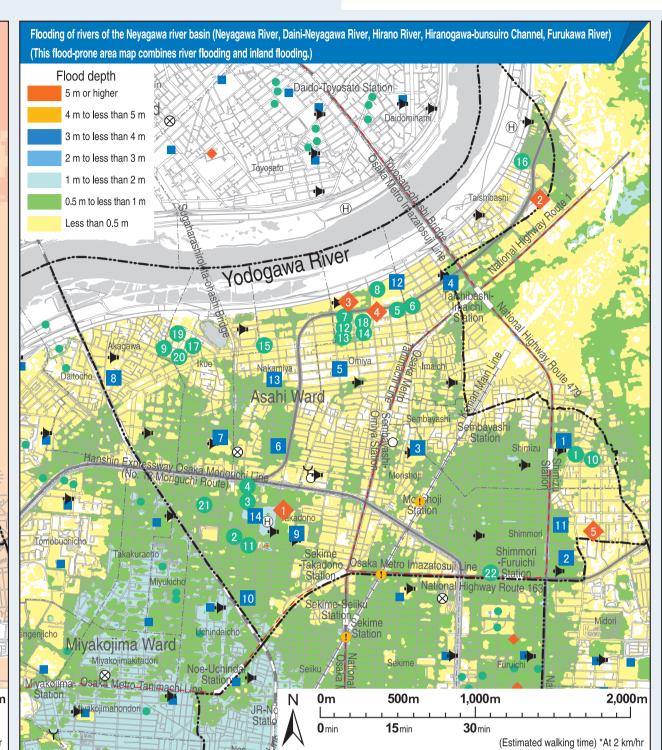

Prevent water from entering your house by sandbagging the front door.

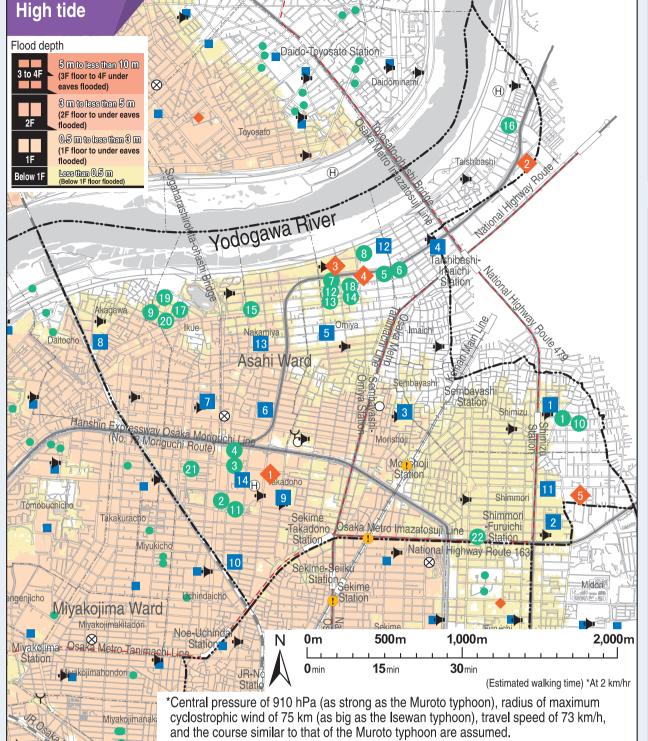

Place a water-filled plastic

bag in the toilet bowl and on

\*A 24-hour rainfall total of 683 mm (Likelihood of probable maximum precipitation: about 1/more than 1,000 years) is assumed.

\*This map shows hazard areas for flooding (river flooding, high tide, inland flooding, tsunami). It does not list designated safety areas and temporary safety areas. Please use this hazard map to find safe evacuation areas in the event of flooding. \*Flood-prone areas have underground shopping and facilities for the infirm. Please see the Regional Disaster Management Plan (The Regional Disaster Management Plan is available at your closest ward office, City Hall, and on Osaka City's website.)

#### Regular precautions and preparations

Have items ready that you can bring with you when you evacuate (emergency kit)

#### Items for emergency grab-and-go bag (backpack, etc.)

□ Drinking water

don't want it too heavy (about 2 to 3 500 ml PET bottles)

□ Emergency food

□ Valuables

Cash (10 yen coins for payphone) bankbook, personal seal, copies of health insurance card and driver's license, etc.

**Infants** 

☐ Medical supplies

☐ Thick gloves (work gloves)
☐ Clothes (outerwear, underwear, socks)
☐ Portable heat patches

☐ Plastic bag and wrap ☐ Toiletries, hygiene products, masks

□ Whistle

☐ Shoes with durable soles ☐ Dry cell and mobile batteries

□ Portable toilet ☐ Tissues and wet wipes

☐ Flashlight and lantern □ Radio ☐ Helmet and protective hood

☐ Rain and cold protection gear ☐ Towel and handkerchief

☐ Utility knife and can opener ☐ Disposable ware (chopsticks, paper plates) ☐ Sanitary napkins and toilet paper

Aim for 15 kg for adult male 10 kg for adult femal Limit what you bring with you to what you can carry by yourself.

Necessities for applicable families and households
