Shorenjigawa Park

We transformed a polluted river into a park at the request of local residents. The Konohana Ward Office is working to install public art in Shorenjigawa Park with the aim of creating a place where art and people can come together, taking advantage of Expo 2025 Osaka, Kansai and the 100th anniversary of the establishment of the wards of Osaka.

## Murals

In the Baika area and throughout Konohana Ward, there are wall murals featuring paintings by artists from around the world. In Konohana, anyone can casually come into contact with art just by walking around the city.
