Legend

- Temporary evacuation site**
Temporary evacuation sites include town squares, parks, and vacant lots where people can temporarily evacuate to. In Miyakojima Ward, most parks and some children's playgrounds are designated as such.
- Designated disaster evacuation site**
Designated disaster evacuation sites are places where basic living necessities, including accommodations and meals, are provided to citizens who have lost their home in the aftermath of a natural disaster, etc. and need ongoing help. In Miyakojima Ward, elementary, junior high and high schools are designated as such.
- Designated safety area**
Spacious parks suitable for mass evacuation are designated as safety areas in case of a large fire caused by an earthquake, etc.
- Disaster prevention-related organization (Ward office/Fire station/Police station)**
- Portable pump**
Portable pumps (small fire-fighting pumps) are installed in parks and schools for local fire-fighting activities. Fire drills are conducted using these pumps as part of local disaster drills.
- Outdoor emergency speaker (disaster prevention administrative radio system)**
Outdoor speakers are installed to broadcast disaster information and evacuation advisories/instructions.
- Tsunami evacuation building**
Tsunami evacuation buildings are facilities where people can temporarily evacuate to escape a tsunami or flooding. (Equivalent height of the 3rd floor or above in buildings)

⊗ Police station ⊕ Fire station ⊕ Disaster base hospital / Disaster medical assistance hospital
 ○ Ward office ⊗ Elementary/junior high/high school ⊕ Disaster relief heliport
