Water Supply Promotion Hub

2026/4 ver.2

What is “ Water Supply Promotion Hub”?

Water Supply Technology Promotion Hub plays the role connecting issues facing overseas water utilities and water supply technology of Japan. We would like to promote expanding and improving water supply in developing countries by providing various information regarding water supply technology owned by Osaka municipal waterworks bureau (OMWB) and Japanese private companies according to the needs of overseas water utilities.

Non-water supply district

Water leakage

Deterioration of facility

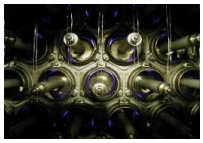

Undrinkable water

Various issues facing overseas water utilities

Technology of OMWB

We have Kunijima water treatment plant, one of the largest WTP in Japan, and have the Water examination laboratory and the training center nearby Kunijima WTP. So, we can show you our technology for whole water supply system (water treatment, water supply and distribution and water quality management) in this area based on the experiences over 120 years.

Kunijima Water Treatment Plant

Water Examination Laboratory

Experience-Based Training Center

Technology of Japanese Private Companies

We are collaborating with Japanese private companies involved in the overseas water business to improve water facilities and equipment overseas. We actively disseminate information on the products and technologies of these partner companies, as we believe that by making them known to overseas water utilities, they can promote improvements in water supply in their respective regions.

Demonstration

When the staff of overseas water utilities visit OMWB for training or technical exchange, our partner companies demonstrate their products and technologies for solving the issues of each water utilities using the field of the experience-based training center.

Exhibition（Aquatic Osaka）

Aquatic Osaka is the exhibition space for Japanese water supply technology. You can see and touch the actual products, models, posters and videos of our partner companies, and may get hints how to solve the issues in your water supply system.

Exhibit

- Actual products or models : 12 companies
- Posters : 12 companies
- Videos : 5 companies
