## What are Osaka City's urban landscape resources?

In Osaka City, important resources that characterize the local scenery play a vital role in shaping the landscape, and to make as many people as possible aware of them and actively use them in community beautification, they are registered as urban landscape resources.

We invite you to visit a place where you can have a picnic while looking at the ocean,  
where you can enjoy marine sports and recreation,  
and where you can visit museums and restaurants,  
we can enjoy them both day and night.
